

Prevent Strategy

Protecting vulnerable people from being drawn into terrorism

The Prevent strategy aims to stop people becoming terrorists or supporting terrorism. While it remains rare for children and young people to become involved in terrorist activity, young people from an early age can be exposed to terrorist & extremist influences or prejudiced views. As with other forms of safeguarding strategies, early intervention is always preferable. Schools, working with other local partners, families and communities, play a key role in ensuring young people and their communities are safe from the threat of terrorism.

There is no single way of identifying an individual who is likely to be susceptible to a terrorist ideology. As with managing other safeguarding risks, staff should be alert to changes in children's behaviour which could indicate that they may be in need of help or protection. Children at risk of radicalisation may display different signs or seek to hide their views. School staff should use their professional judgement in identifying children who might be at risk of radicalisation and act proportionately. Even very young children may be vulnerable to radicalisation by others, whether in the family or outside, and display concerning behaviour. The Prevent duty does not require teachers or childcare providers to carry out unnecessary intrusion into family life but as with any other safeguarding risk, they must take action when they observe behaviour of concern.

Indicators
