

I should already know:

Local and global locational knowledge, understanding of countries and local area, understanding of hazards

I will learn:

- What is meant by interconnectedness
- How the Afghanistan heroin trail shows us that crime interconnects our countries
- How the Icelandic volcanic eruptions demonstrate global interconnectedness
- How international migration shows global interconnectedness
- How the covid-19 pandemic proves our world is interconnected
- How interconnected will our world be in the future?

This will help in the future:

The changing economic world
The challenge of resource management

Key Words

Interconnectedness	Places and the people and organisations are interconnected with other places in a variety of ways.
Life expectancy	The average age a person can expect to live to
Infant mortality	The number of babies who die before their first birthday
Literacy rate	The percentage of a population who can read and write
Migration	Movement of people
Immigrant	Someone moving into an area
Emigrant	Someone moving out of an area
Primary sector	The extraction of raw materials
Secondary sector	The manufacturing industry

Greater Depth Challenge

Choose another global event and explain how this proves that our world is interconnected
