

Science

There are 4 main types of pollution: air, water, noise and land/soil pollution. On the next page, a poster demonstrates this information and explores the cause and effect of all 4 types of pollution. This week I would like you to create and present the 4 types of pollution and explain the cause and effect of each one. Be creative in your presentation and do not forget to send pictures of what you have done through 2email on purple mash.

History

Last week you explored the fact sheet provided around Chichen Itza. This week, we would like you to create a tourist information sheet that includes pictures and a range of interesting facts you recorded last week.

Art

Over this half term, we have explored how to convey (show) emotion through art. We have focused on using sketching skills however, this week I would like you to use natural material and objects to create a picture of your choice. Your picture must convey (show) the emotion of happiness so think carefully about the colours you use.

Jigsaw

Make friends in lockdown with #MyDearNewFriend.

The National Literacy Trust is supporting a new writing initiative called 'My Dear New Friend' which encourages children to write letters to people living in care homes. Click [here](#) to find out more and how to take part.

Metacognition

Metacognition is a big word for something most of us do every day without even noticing. Reflecting on our own thoughts is how we gain insight into our feelings, needs, and behaviours — and how we learn, manage, and adapt to new experiences, challenges, and emotional setbacks. It is important to develop your metacognition as this will help you become a better independent learner.

This week I would like you to reflect on everything you have learnt over this half term. Record at least 5 things on a mind map.

Mindfulness

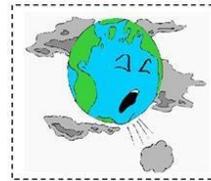

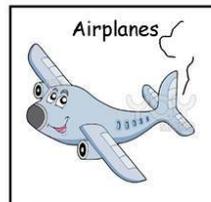

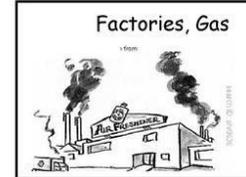

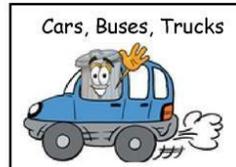

Go for a walk and concentrate on the act of walking. What movements does each leg perform in each stride? Which part of your foot hits the ground first? What does the ground feel like underneath your shoe/ foot?

Types of pollution Causes and Effects

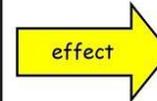

There are several types of pollution:

1. Air Pollution

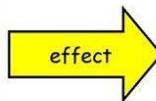

- a. Breathing Disease
- b. Global warming

2. Water Pollution

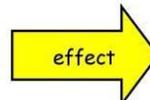

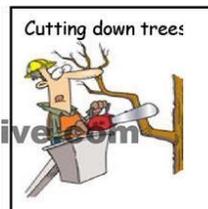

- a. Contamination of water
- b. Stomach ache
- c. Fish and plants die

3. Noise Pollution

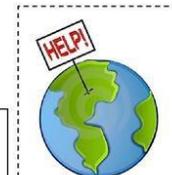

Hearing problems

4. Land /soil Pollution

Effects on the environment as well as human health.

Enlarged pictures for your art learning. You can use these as inspiration.
