Week Commencing 18th May 2020

Science – blow a balloon without breath!

1. Put a small amount of water in the bottom of the bottle, and then add the same amount of vinegar.
2. Using a funnel, half fill the balloon with baking soda (between $\frac{1}{2}$ and 1 teaspoonful should be enough).
3. Carefully place the balloon over the neck of the bottle and allow it to droop over to the side, making sure none of the baking soda falls into the bottle.
4. Now lift the end of the balloon and pour all the baking soda into the bottle. Shake well and place the bottle on a table. Watch the balloon inflate all by itself.
