

Science

Research one of the sports in the Paralympics.

- How is the sport adapted for those taking part?
- Why are the Paralympics important?
- How is the sport you are researching played? Create a promotional leaflet for it.

Geography

Which animals live in Antarctica?

How have they adapted to the environment? (link to prior learning)

Look back at your research of the midnight sun. How do you think this impacts on the animals living there?

Religious Education

How would you feel if...  
 ...you had to spend two hours each day collecting water for you and your family to use for drinking, washing and cooking?  
 ...there were 60 children in your

class and only one teacher?

...you and your family were only able to eat one meal a day?

...your parents weren't able to get jobs?

...you had to use dirty water from a river for drinking, washing and cooking?

PSHE

The media has a really big impact on the way we look, think and dress. The media can be both positive and negative.

1. Make a list of all the ways you access the media
2. Make a list of the positives of having access to these medias
3. Make a list of negatives that the media can have on people.

Art

Using the techniques you practised last week, draw these waves using only soft pencil strokes. When you've done the general outline, go back over some parts to make it darker and show the depth.

Looking Ahead

• How did you handle things when they went wrong at primary school?

• How did you react when you got stuck?  
 • Think about a time when you showed a 'kid awesome' (**AWESOMENESS takes masses of practice to PERFECT**) attitude. Write about it here:

• Write down the kind of person you want to be at secondary school.
