

# OASIS ACADEMY DON VALLEY

## Topic Homework Menu Summer 1

Class Wilson & Lewis  
Complete a minimum of 3.

### Starters

- Research the different classification of animals. Can you create a report on your favourite animal, using the classification terminology needed?
- Can you write your own short story in the style of Shaun Tan, this terms author?
- Research Shaun Tan and create a biography of his life – are there any more of his texts that you would like to read?

### Mains

- Can you create your own version of a classification key for a friend to follow? Let them choose an animal and find out what classification it is!
- Can you use some household items (recycled ones) and create a 3D model of your own lost thing? Think about what animal features it might have too.
- Use your iPad and Kahoot to create a revision quiz. This could be for grammatical terms, maths topics or arithmetic type questions. Share it with your teacher and we might even get to play it together in class.

### Desserts

- Read a book that you wouldn't normally choose on Myon and leave a review. Can you find a new book on Wheelers to read?
- Illustrate your story from the starters menu, also in the style of Shaun Tan. How would you draw the creatures that you have described? What type of artistic devices do you need to remember to use?
- Use the internet to research different deserts and where they are located on the globe. Can you find them on Google Earth and explore the area? Take screenshots to share with your teacher.
